44
45 \title{Hello, world!}
46 Here is a hello-world template document to illustrates a few \ConTeXt\ features. Have fun. You can find a lot more
47   information at \from[wiki]; the preceding text should be colored and clickable, and clicking it should take you to
48   the wiki.
49
50 \subject{A list}
51 Here is an example of a list.
52 \startitemize[a] % tags are lowercase letters
53 \item first
54 \item second
55 \stopitemize
56
57 \subject{Math}
58 An equation can be typeset inline like  $e^{-\pi i}+1=0$ , or as a displayed formula:
59 \placeformula[eq:factorial-example]\startformula
60 \int_0^{\infty} t^5 e^{-t}\,dt = 120.
61 \stopformula
62 And you can refer to them by name.
63
64 \subject{Text with figures}
65 \placefigure[right,none]{}\externalfigure[dummy]
66 Now text with a few figures. The first figure goes on the right, with the paragraph flowing around it.
67
68 Here's another reference to the numbered equation -- equation \in[eq:factorial-example] on \at{page}[eq:factorial-example]
69   ], so that you can test clicking on it or on the page reference.
70
71 \vfill
72
73 \noindent
74 \framed[corner=round, width=\textwidth,height=1in, backgroundcolor=gray,background=color]{
75   This document is in the public domain, so that you can improve it, share it, and otherwise do what you want with it.
76   Suggestions are welcome. You can send them to me at \from[sanjoy] (Sanjoy Mahajan).}
